**NEW ERA IN YOUTHEN WITH
PLASMA TECHNOLOGY**

14C100229

The beauty and aesthetic sector continues to work on skin renewal and rejuvenation with all its might. It's constantly coming up with new processes and devices, the reason for this is actually the rapid change of technology and the development process it brings. While the demand for "rejuvenation without surgery" is steadily rising, we follow innovations closely to keep pace with it. Technological innovations in laser therapy are helping to eliminate the negativity on human by adding a new one every day. Environmental factors, traces of environmental pollution abandoned years can now be eliminated. In the field of medical aesthetics, the CROSS brand, which closely follows the latest technology and new developments in the world and renews itself in parallel with developments, is with you a brand new device about body / skin aesthetics: CROSS PLASMA HG (HUGE GENESIS)!

The device converts the ambient air into plasma energy with the electrical activity on the surface of the skin to be applied. This energy evaporates the problematic outer surface of the skin and the process of new tissue formation begins. Gas creates a very high heat on the skin with plasma energy. By point applications Also provides skin tightness between points. 6 thousand 500 degrees centigrade, an application that is particularly active in the application of standard laser heat is created by the activity. The surrounding tissue is not damaged because the temperature is too high. Especially in the area where the upper lid hangs over the eye, where there is more, in the lower cover problems, especially in the wrists, In the cracks formed, in acne scars, in the active stream, on the face of the problem with almost any scar.

PLASMA HG (HUGE GENESIS) = IONIZE ATMOSPHERIC GAS = FOURTH STATE OF MATTER

Thanks to PLASMA, the skin texture is sublimated and the heat transfer to the surrounding tissues is prevented in an undesirable amount. The working principle of CROSS PLASMA HG (HUGE GENESIS) can be explained in three steps; The potential difference between the plasma and the skin. + The ionization of the gases in the air (Plasma formation) + The sublimation of treated tissues without transmitting heat to other tissues. CROSS PLASMA HG (HUGE GENESIS) method, which works with plasma energy, is applied for eye renewal, stain, acne and scar treatment for aesthetic surgeons. Device; Converts the ambient air (ie ionized gases) to Plasma Energy by the electrical activity on the skin surface to be applied. This energy evaporates the problematic outer surface of the skin and the process of new tissue formation begins. Plasma HG (HUGE GENESIS) does not affect hair roots, capillaries, fat and nerve tissues outside the troubled region.

PLASMA, which acts on the skin and subcutaneous tissues in three separate functions, stimulates new tissue healing as well as reusing nutrients that have slowed or completely stopped production in the body. Thus, after the procedure, an extremely vigorous, healthy and youthful skin texture can be obtained. It has been shown that youth and resurrection lasted for months.

NEW GENERATION NON ABLATIVE MEDICAL DEVICE WITH SUPERIOR GERMAN TECHNOLOGY

CROSS PLASMA HG (HUGE GENESIS) is a new generation device developed with superior GERMAN technology used for the treatment of various skin lesions, tissue tightening without surgery, deep line and reduction of wrinkles. Plasma is actually the fourth state of matter. Non ablative surgeon CROSS PLASMA HG (HUGE GENESIS) is a reliable, comfortable and high performance medical aesthetic device that can be performed without any electrical connection, working wirelessly, in terms of the user! The working principle of this device is PLASMA effect. When combined plasma applications are applied together, much clearer and more successful results can be obtained. With this method, skin rejuvenation is ensured. The PLASMA HG (HUGE GENESIS) system has a different mechanism of action than the laser and IPL mechanism, it works with air.

FOURTH STATE OF MATTER: ESTETIC APPLICATION WITH PLASMA ENERGY

It acts by converting the nitrogen and water vapor, which are gaseous in the environment of the zone where it is applied, into plasma with high energy. The ion cloud, which is the result of interaction, affects the surface of the skin and regenerates very quickly. CROSS PLASMA HG (HUGE GENESIS) creates a small electric arc in the application area without heat transfer, which damages surrounding tissues outside the application area. It is the same as the mechanism of lightning. Therefore, CROSS PLASMA HG (HUGE GENESIS) application can be called skin lightning. Plasma energies can also be used for topical eyelid aesthetics without skin rejuvenation or plasma energy. It is a CE certified application which has been widely used in Europe for 15 years. As the fourth state of the matter CROSS PLASMA HG (HUGE GENESIS) using the defined plasma method, dermatologists and For Plastic Surgeons it is specially designed to be used like laser, radio scalpel.

INTENSIVE PLASMA THERAPY FOR SUBLIME TISSUES

CROSS PLASMA HG (HUGE GENESIS) is a plasma therapy that is very successful with its cumulative effect. Wavelength and special title are applied according to the needs of the person. Then apply in sessions. It is very effective in skin tightening, superficial spot treatment, active acne lesions, vascular lesions. The tip of the device produces an electrical arc at very high temperatures, and when the device reaches a certain distance from the skin surface, the arc ionizes the atmospheric gases to reveal an explosive energy (plasma energy). The resulting energy is called the keratinocyte in the top layer of skin. It sublimates the cells, that is, the solid touch allows the transition to gas directly without liquefaction.

Undesirable heat to the surrounding tissues and subcutaneous layer (subcutaneous fatty tissue) transmission is prevented. Thus, when the atmospheric gases are ionized, the plasma energy remains only in the millimetric range seen by the device, and the surrounding tissues are not affected.

RELIABLE, COMFORTABLE AND HIGH PERFORMANCE DEVICE

The process is highly SAFE, as it reaches a depth of about 200 to 300 nanometers (one millionth of a millimeter) at the same point. Aesthetic and cosmetologically, it allows to get great results. It is a very good option for people who are disturbed by this condition, especially when the eyelids are at the limit of surgery but are afraid of surgery. At the same time Botox et al. It is possible to have sagging and wrinkles in some eyelids, which is why it can be preferred in younger ones. It can be done only by local anesthetic creams and it is a treatment option without short term side effects such as healing and pain.

CROSS PLASMA HG (HUGE GENESIS) APPLICATION METHOD

Before application of CROSS PLASMA HG (HUGE GENESIS), the area to be treated is cleaned with antiseptic liquid. Apply local anesthetic cream, 20 - 30 min. expected and the transaction is carried out. It takes 5 to 20 minutes after local anesthesia according to the size of the area to be treated. Depending on the needs of the person, the required number of plasma shots are made. Specific titration allows specific plasma shots to be made on both the face and body as well as small lesions. The process takes about 15-30 minutes. There is no pain during application, a slight amount of heat may be felt, and there may be burning or tingling sensation after treatment.

CROSS PLASMA HG (HUGE GENESIS) APPLICATION AREAS

- Blefaroplasti
- Lower-Upper eyelid wrinkles
- Eye lid recovery without surgery
- Wrinkles and lines on the lip
- Wrinkles around the cracks around the abdomen
- Stomach and Neck stretching
- Ear wrinkles
- Facial and body tightening / Sagging and wrinkle treatments
- Conditions such as fibroma, wart, papilloma, xanthorax
- Bleeding lesions from the skin
- Wart - Meat moles (riskless mites)
- Fat cysts
- Tattoo removal in all colors
- Stain remedy
- Acne treatment
- Correction of scars caused by acne and other causes
- Scars, acne scars, scars from surgery or accidents, and treatment of lines

CROSS PLASMA HG (HUGE GENESIS) SUITES FOR WHO?

- For tarnish skin
- If the skin surface has a rough appearance or if a smoother skin is being targeted
- Large pores in the skin,
- Old acne scars
- Mild cracks
- Light skin stains
- Aged 35 years without any of the above problems
- Suitable for skin renewal and moisturization

CROSS PLASMA HG (HUGE GENESIS) is not a sole stain treatment for deep stains as it aims to renew the deep upper layer. CROSS PLASMA HG (HUGE GENESIS) for facial rejuvenation and skin revitalization is preferred for the face but it is applied to the décolleté region, abdominal and leg cracks, and for whole body skin smoothness. The treatment is suitable for everyone, but should not be used in areas with active wounds and infections in the area to be treated.

CROSS PLASMA HG (HUGE GENESIS) USAGE OBJECTIVES

Percentage aging is a very dynamic process and therefore face rejuvenation practices are very important. Throughout life, elderly statements appear in different regions of each age. The signs of aging first begin to appear around the eyes. Goose legs, bagging on eyelids, eyebrow drop and forehead streaks, etc. ... At the same time, the lines appear to be more prominent in the nose and cheek area, although they appear to be relatively slow. Then sagging on the cheeks and loss of the clarity of the cheekbones, sagging in the air, deep wrinkles on the neck and face arise. Now, in facial rejuvenation applications The devices, which have been prepared to provide a specific result and which are actively medically proven, offer great advantages. In facial rejuvenation

applications now, a device that has been developed to provide a specific result for this purpose, and whose effectiveness has been medically proven, offers a great advantage. With CROSS PLASMA HG (HUGE GENESIS), plasma is applied at various wave lengths with multiple plasma platforms on the skin. In this way one or several methods can be combined and used according to the need of the person. Body deformation differs from person to person. Genetic factors are also quite dependent on external factors. As our age progresses Our skin also ages. Being parallel to them and being well-groomed is true for the real beauty. Our purpose is never unnatural It is not obtaining results. Our main goal is not to turn back the aging but to just press the brake, It is necessary to choose appropriate methods to stop aging and to use appropriate ages. Therefore, age management is preferred instead of rejuvenation. CROSS PLASMA HG (HUGE GENESIS) is a personal plasma Treatment protocol. In sessions, serial applications are performed without any skin. A more vigorous, dynamic, more vivid appearance is achieved and When you get older, you get a brake.

CROSS PLASMA HG (HUGE GENESIS) SPECIFICALLY DEVELOPED FOR THE FOLLOWING OPERATIONS

Much more than today's technology, 30G ultra fine needles are used to better affect the target tissue. Skin depth 0.06 mm.

- Skin Tightening
- Rejuvenation (Skin rejuvenation)
- Deep Plan Biostimulation (Plasma laser used for facial rejuvenation Technology)
- Reformatting

3 SPECIAL TIPS

CROSS PLASMA HG (HUGE GENESIS) ADVANTAGES

CROSS PLASMA HG (HUGE GENESIS) working principle : plasma

- 3 special and 2 step power settings
- Constant emission in power supply
- strong sterilization, deep spot cleaner
- No electrical current flow to the patient, (no grounding plate)
- No consumable material,
- Wireless rechargeable advanced technology
- Easy to carry and easy to use
- Economical and practical without the need of additional material,
- Prevent bleeding and medical risks

CROSS PLASMA HG (HUGE GENESIS) TECHNICAL SPECIFICATIONS

	Anesthesia	Cream Anesthesia	
	Application Process Time	15 - 20 minutes	
	Healing Process	No	
	Final Result	After 4 - 6 sessions	
	Attention	Light Redness	
	Ache	No	

KLİNİK VERİLER

PLASMA HG (HUGE GENESIS)

It is medically proven that it can be used for blood clots with high clotting, pigment spots, warts, flat warts, shallots, skin tumors and other skin problems. More effective than Laser, ion, ice and medical treatment.

OPERATING TEMPERATURE	0 ° C - 40 ° C
RELATIVE HUMIDITY	45% - 77% (no condensation)
ATMOSPHERIC PRESSURE	70 kPa - 106 kPa
FREQUENCY	1.1MHz±0.3MHz
MAXIMUM OUTPUT POWER	At least 10W
POWER LEVEL	2 level (medium to high)
SKIN DEPTH	0.06 mm
APPLICATION POWER	AC220V±22V 50Hz±1Hz
MACHINE SIZE	23 x 13 x 5 cm
WEIGHT	1.2 kg
